

*An on-line catalogue of Arabic manuscripts
in the Library of the Hungarian Academy of Sciences
Phase Two*

TIMA final grant report

by
Kinga Dévényi
Library of the Hungarian Academy of Sciences
8 October 2010

With the help of TIMA, a project was started in November 2008 to catalogue sixty Arabic manuscripts in the Oriental Collection of the Library of the Hungarian Academy of Sciences (LHAS) within the on-line catalogue of the library. Upon the successful realisation of this project, TIMA helped with a further grant in 2009 the completion of cataloguing. In this new phase the description of 112 MSS was envisaged.

Although the Library was established in 1826, and although its Oriental Collection has been the single most important source for Oriental studies in Hungary, its manuscript collections remained without cataloguing until recently. A few years ago the catalogue of Turkish manuscripts was printed, but the Arabic and Persian manuscripts remained without a proper catalogue. This project intended to remedy this situation thereby bringing the collection to the attention of the interested public.

Thanks to the experience gained in the first phase the current project was concluded without any major technical difficulties. The team consisted of the same persons who collaborated in the first phase and who divided among themselves the different tasks of on-line cataloguing (description, bilingual input, transliteration, cross referencing, image input, etc.). The MARC fields were the same as those used during the first phase of the project, so by now all the 173 Arabic MSS can be browsed and searched on-line.

In the meantime a new Arabic MS was donated to our library, so in this phase a total of 113 MSS have been entered in the online catalogue of the LHAS, within the database “Manuscripts of the Oriental Collection”. Since the majority of MSS contains multiple works (between two and nine), the number of works catalogued in this way is 178.

These records are available and searchable on-line. The records are bilingual (English and Arabic), names and titles can be searched and browsed in Arabic, in LOC transliteration and in the transliteration system used generally by the LHAS.

The records can be reached via the main portal of the Library: <http://www.mtak.hu> (ALEPH). Shelf marks (call numbers) start with “Arab”, so it is quite straightforward to have a list of all the MSS.

We consider an important feature of the on-line catalogue that all the entries contain good quality scanned images of at least two pages – which can be enlarged– of each MS (containing the incipit and the explicit).

We are grateful to TIMA for supporting this project and hope that in the near future a printed catalogue, based on the on-line data, can also be published.

A list of the 113 Arabic MSS added to the on-line catalogue within the framework of the current grant
